

A Better Way to Protect Your Investment

FIBREBOND FIELD SERVICES has been maintaining, servicing and upgrading our customers' network assets since 1982. Our Field Service crews are highly experienced with all of the major equipment components of both wireless and wireline networks and are trained and knowledgeable of current Network Standards, Practices & Guidelines. Our typical scope of work ranges from single shelter refurbishments to large scale multi-year capital equipment upgrades and replacements.

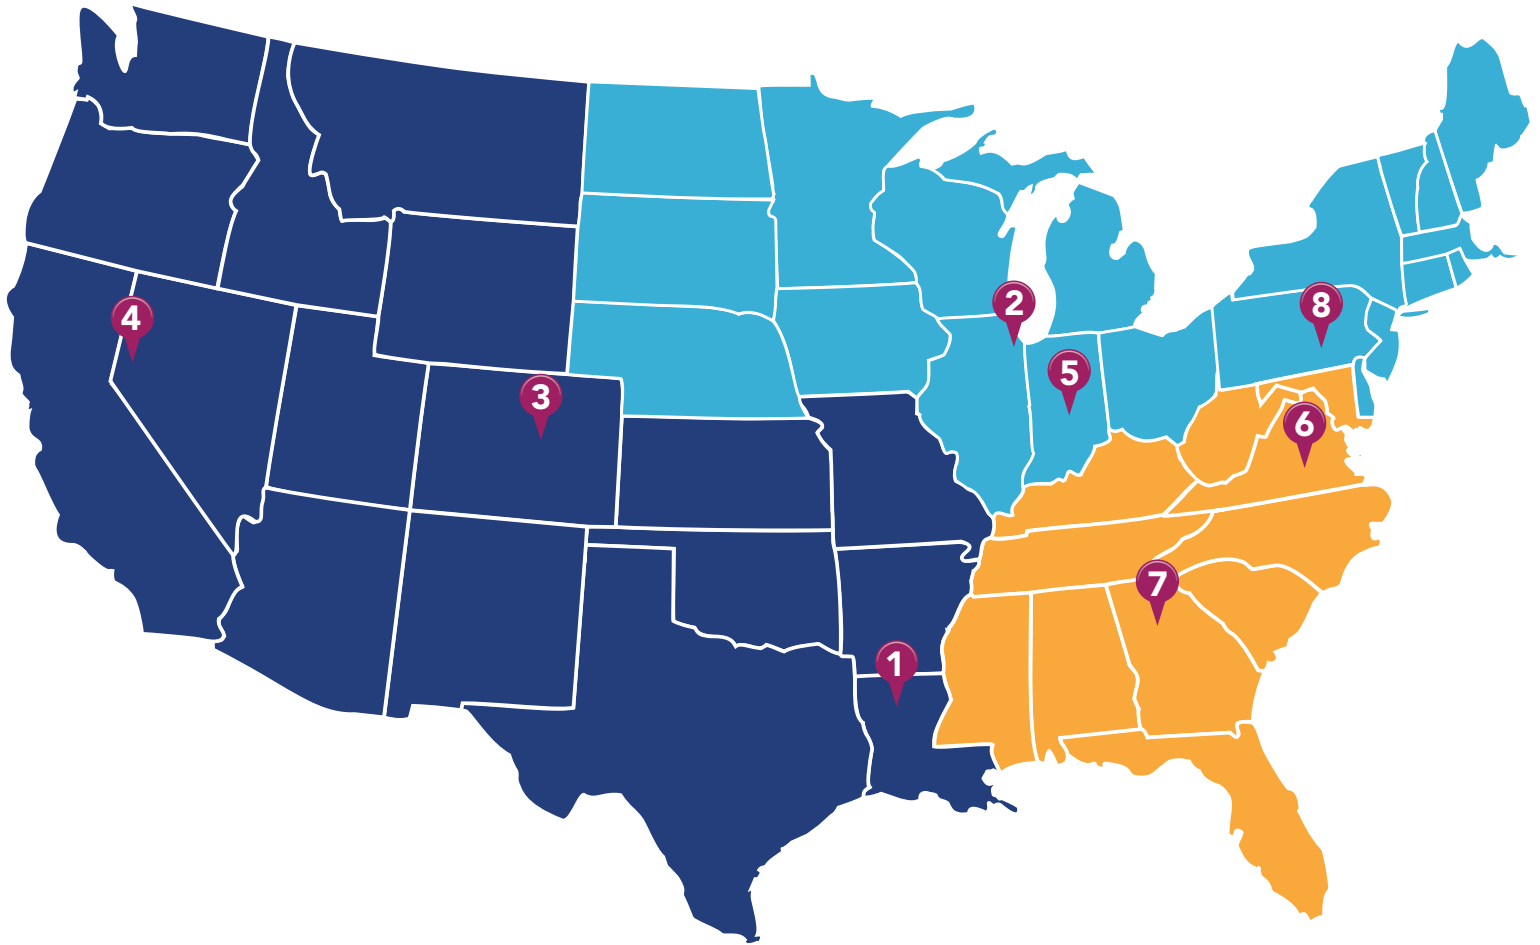

CAPABILITIES

- Complete Shelter Refurbishment
- Power & Infrastructure Mods
 - HVAC
 - Generator
 - Battery
 - DC Power Plant
 - ATS
- Equipment Warehousing & Logistics
- Field Equipment Installation
- Disaster Response

FIBREBOND Field Services help our clients maintain and improve their investment and prevent network down time. Our teams begin by conducting site audits, which are then followed by detailed price proposals.
